Work experience

Bach Khoa Elevator
Ho Chi Minh
Viet Nam

Installation Elevator Engineer

07/2017 – 08/2018

- At the company, I have been learned a lot of things such as working with my team, resolving problems, interacting with the practical working environment, ways to split my workload into a lot of smaller tasks...
- Besides, I have been got a couple of useful characteristics for work and my career in the future. Those one are such as patience, persistence in my work

Project worked

- Using Python, Keras to build Convolutional Neural Network and Lasso model to attend House Price Prediction competition on Kaggle. Reached 1187/4174 rate
- Using Python and libraries to explore data, analyze data, handle miss data and build Machine learning algorithms to solve BigMart Sales Prediction challenge.
- Using C, PHP, MySQL to build the system that store, manage and supervise Photovoltaics System via the internet.
