Profile

My full name's Huong Ngoc Thi Vo. I'm a back-end developer and my main programming language is Java. One of my career goals is to become a Java expert in 5 – 7 years.

I like to read books in my free time to explore new concepts or achieve new knowledge for some area. I can read English documentation and speak pretty well.

I define myself as a devoted, ambitious, decisive, self-motivated, friendly and funny person.

Education

Dec 2012: I started learnt OOP programming in FPT University and from some tutorials via Internet or e-books.

Jan 2015 – May 2015: I joined On-Job-Training in FPT Software.

May 2015 – Aug 2015: I was back to the University to finish the three-last semesters and learnt a bit about front-end development like Java Script, JQuery, Ajax, Css, and Html5...

Now: I'm last year ungraduated student and I want to challenge myself in real work environment as well as to learn and mature more for 6 months before graduation.
