Cong Nguyen Thanh
Software Developer

A self-motivated software developer with hands-on experiences in the JVM ecosystem (Java, Scala) and web development (Spring Framework), especially RESTful APIs. I'm interested in writing clean, maintainable and well-tested code. Beside that, I'm also passionate about the big data processing with the Open source stack (Spark, Kafka).

WORK EXPERIENCE

Java Developer
Axon Active Vietnam

12/205 – Present   *Danang*

Achievements/Tasks

- I spend almost the time working as a back-end developer. Designing and building data-intensive applications, RESTful web APIs. Working with database not only SQL but also NoSQL, improving the performance of the system with caching. Beside that, I have experiences with security using OAuth2.
- Mad Startup (December 2015 – August 2016): A web game that allows users to create and run their Startup.
- Fusion Metrics v1.0 (September 2016 – September 2017): Advanced mobile analytics reporting.
- SBB Dashboard (January 2017 – September 2017): A dashboard for user's locations tracking of SBB which is a transportation company in Switzerland.

CERTIFICATES

Oracle MOOC: Java Microservices Session 2 certificate (08/2017 – Present)

Scala Programming for Data Science - Level 1 (11/2017 – Present)

PERSONAL PROJECTS

Traffic Data Monitoring (10/2017 – Present)
- Researching about big data processing with Apache Kafka and Spark

eCommerce Cloud (09/2016 – 12/2016)
- Researching about Microservice Architecture using Spring Cloud

EDUCATION

Bachelor's degree
Da Nang University of Technology

09/2011 – 08/2016

Courses

- Information Technology
